Currencies: Dollar Euro

CURRENCIES: The Euro is hanging on in there. The rally stems from stale shorts rather than vigorous Euro buying. Sterling is similarly tracking sideways and upwards against the Dollar. But the wider context suggests that it remains in grave danger structurally. No news in the Dollar yen. And Short Euro positions look favoured in the Sterling Euro.

There is the making of a triple top certainly.

But the market has bounced from the rising diagonal support.

(Coincident with that was the Fibonacci support too...)
