WEEKLY CHART – CONTINUATION:

Recovery has turned focus towards the 23.6% retracement at 4.685.

DAILY CHART – May-13:

A second recovery phase this year has seen a challenge to the Nov high now. A push through here, which looks likely in due course, would call for higher targets, such as a Fibo projection at 4.4540.

The 3.7160 22-Jan high offers support now.
