Summary

SOY BEANS AND DERIVATIVES:

We remain short of the oil (noting elsewhere the ongoing technical weakness of Oil)

SOY: Soy Bean

Monthly Chart - Continuation:

The failure to hold above the Prior High suggested some underlying weakness.

But note the powerfully clear and INTACT long-term diagonal support.

Look closer.

Monthly Jan 14 Chart – Continuation:

Here's the retest of the critical support from the rising diagonal

If that clearly breaks, the bears will be encouraged.

But not before.

Weekly Chart Jan 14:

The divergent price action is unusual and difficult to read.

Stand back.

We remain square.

Monthly Chart Continuation:

This long-term chart shows a break of the critical diagonal bull trend line support.

Look closer.

Weekly Chart – Continuation:

The critical breakout levels which are now resistance.

And more resistance from Prior Lows.

The bears look in charge. And the short-term bounce through the first resistance of note at 41.57 looks to be falling.

Daily Chart Jan 14:

This bear market remains intact long medium and **SHORT TERM**

There is still resistance from Prior Lows on any rally.

Stay short-term short for choice but with close stops **ABOVE 42.08**.

The bear stance holds good. Note well the four failures at 42.08. **Note also a confirmed break of 40.07 will complete a small short-term Top.**

ADD to shorts on a confirmed break of 39.53 bringing stops closer.

Quarterly Chart Continuation:

The descent through the Prior High suggests some underlying weakness.

Will it be sustained?

Weekly Chart – continuation:

But this is powerful support

The return to the support from the Prior High at 385.30 that has been good support in the past and, for the moment, remains good support.

Look closer.

Jan 14 daily Chart :

The price action has bounced off the very good prior High support at 400 – but, for all that, short-term, the market remains in a trading range.

Stay square.

Summary

CORN and RAPESEED: We are still short of Corn, the market drifting in our favour. And though bearish of Rapeseed, need a short-term breakdown there to enter shorts.

Monthly Cont. Chart

The triple failure at the 800 level (having tested above it and been unable to sustain that break) has been ominous for the bulls.

And the push beneath this 510 low has completed a long-term Double Top encouraged fresh selling...

Which has forced the break through the rising diagonal

The minimum move for the Double Top? **About 350**

Weekly cont. Chart

In greater detail.

Note the failure of the Prior Lows that has led to the completion of a Double Top.

And now they are good resistance above the market... Held firm reversing the rally.

Ratcheting the market lower.

Daily bar chart Mar 14 contract

The well-established bear trend

The bears are in charge.

We were fresh sellers on a break of the Prior Low at 459

It is now confirmed as good resistance.

So too is 445.

Stay short.

Monthly Chart Continuation:

The third failure above 500 looks bearish for the market.

The move down through the Prior Lows and the Prior Highs is important as it creates good resistance for any rally.

This suggests a move back as far as 250 or so.

Weekly chart

The sideways consolidation beneath the Prior Highs and lows looks increasingly like a bear continuation Triangle.

(but it may have developed too far towards the apex of the triangle)

Look closer.

Daily Feb 14 Chart :

This is a continuation Triangle (redrawn) - potentially – but it has yet to break..

Nonetheless, because it is forming beneath the massive resistance at 385 we favour a bear breakdown in advance of the completion of the Triangle.

More cautious bears will wait for a break of the rising lower diagonal at 368 or even 357.

Stay SQUARE.
