Summary

SOY BEANS AND DERIVATIVES:

There no good trading structures in the Soya contracts. Watch Oil for a good bear signal should recent lows be broken.

SOY: Soy Bean

Monthly Chart - Continuation:

The failure to hold above the Prior High suggested some underlying weakness.

But note the powerfully clear and INTACT long-term diagonal support.

Look closer at the testing of the rising diagonal

Daily Aug 2014 Chart

We know from the long-term charts that the recent low at 37.61 was a test of the long-run diagonal support.

So a break beneath that is needed for the bears to really take heart in the medium and long-term.

Yet a push beneath 40.05 would surely signal at least a retest of that level at 37.61....

Daily Chart July14

Bulls have the evidence of a break up through 461 to add on.

We are long here with stops beneath 455.

And now the push above 494 has added to the bull trend - providing additional support beneath the market.

Summary

CORN and RAPESEED and WHEAT Corn remains the clear sell in these markets. Wheat looks powerfully bearish in the short term, but lacks medium and longer term bearishness.

Monthly Cont. Chart

The triple failure at the 800 level (having tested above it and been unable to sustain that break) was ominous for the bulls.

The completed a long-term Double Top **encouraged fresh selling...which forced the break through the rising diagonal**

(The minimum move for the Double Top? **About 300**)

But note the rally back to the breakdown level above 500.

Look closer.

Weekly cont. Chart

In greater detail.

The market is rallying back to the resistance at 509... Only if that were broken would the bulls be in charge.

So, is this a selling level?

Daily bar chart Sep 14 contract

Now study the price action beneath that resistance...

The pause is interesting, but bears should wait for a break back down beneath the 490 horizontal before selling....

We are sellers here...

Monthly Chart Continuation:

The third failure above 500 looks bearish for the market.

The initial break beneath 392 was interesting but the rally back above has threatened the integrity of the structure...

Weekly chart

The detail is more constructive.

The market has failed to break back up through the 385 band of resistance....

Wait for a break beneath 348/353.

Daily May14 Chart :

We remain long-term bears. The question is- where to sell in the short-term chart?

Now it feels right to wait for a break beneath 342/352
