So the support from the Prior Highs looks as if it has failed.

There are wild swings, but on the whole the Dollar looks set to gain strength.

Note though, the FAILED break beneath 1.1297 beginning the next leg down (strengthening Dollar).

Wait for a break

Note Day Key reversal

The bounce back above the Prior Low was disappointing for the Dollar bulls but the bounce hasn't been sustained...yet.

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.

**The market rallied back deep into the band of resistance as far as the 50% Fibonacci resistance – but failed there.**

Look more closely.

### Dollar Sterling weekly spot cash chart

The **Double Top** at the recent high was interesting BUT: the bull trend broke down in April 2018..

the break of both the Prior High and diagonal support (and a coincident Fibonacci support) from 1.3656 was a clear sell signal for Sterling.

Now the range since August has been broken.

Sell sterling again.

The long-term condition of the market is not clear:

The market has failed to push through the old 3769 High and is looking vulnerable.

Note the break beneath the Prior Low of 3163 will it be confirmed?

### Eurex EuroStoxx 50 weekly continuation futures chart

Is this a Double Top ?

If so, then look for a minimum move down to the lows of 2018 at the band 2594-2649.

**Liffe FTSE 100 Monthly continuation futures chart**

If the market closes at the end of December beneath 6802 then the support from the succession of Prior Highs (6796, 6995) has been smashed, so the market is no longer underpinned.

**Liffe FTSE 100 Weekly cont. futures chart**

Watch the Prior Low. The trigger for the break of the monthly chart is maybe the Prior Low in the weekly chart at 6766.

A break of 6766 will suggest a further breakdown
