CURRENCIES:

Dollar weakness against the Euro is still there in the short-term, as a reversal structure is building nicely. Note well tho' that the medium and long-term Patterns remain obstinately Dollar-friendly. Against the Yen the Dollar has been weak for some time. But on the other hand, Sterling looks weak and likely to go weaker still against the Dollar.

Dollar Euro monthly spot cash chart

These powerful resistances above the market at 1.15 and above **have reversed or at least halted** the bear Dollar/bull Euro market ...

The pressure is on the Euro now. **We still favour a strengthening Dollar in the longer term.**

That is, a continuance of the trend from the beginning of 2018.

So the support from the succession of Prior Highs (6796, 6995) was smashed, then there was a **powerful bounce** from the diagonal uptrend support drawn from 2009... and the consequent push back above the band of support from the Prior Highs.

This should still give enormous confidence to UK investors because of the very long-standing and powerful support still beneath the market.
