### Dollar Euro monthly spot cash chart

These powerful resistances above the market at 1.15 and above **have reversed or at least halted** the bear Dollar/bull Euro market ...

The pressure is on the Euro now. **We still favour a strengthening Dollar in the longer term.**

[That is, a continuance of the trend from the beginning of 2018.](#)

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.

The market rallied back deep into the band of resistance as far as the 50% Fibonacci resistance – **but failed there.**

Look more closely.

Note here the repeated testing of the resistance band formed from low closes.

It's a clear failure...

### Liffe FTSE 100 Monthly continuation futures chart

So the support from the succession of Prior Highs (6796, 6995) was smashed, then there was a **powerful bounce** from the diagonal uptrend support drawn from 2009... and the consequent push back above the band of support from the Prior Highs.

This should still give enormous confidence to UK investors because of the very long-standing and powerful support still beneath the market.

### Liffe FTSE 100 Weekly cont. futures chart

The bounce back up through the resistance from the Prior Lows was impressive and began the rally.

Now watch and wait for a confirmed break up through the Prior High at 7474...
