Dollar Euro monthly spot cash chart

These powerful resistances above the market at 1.15 and above **reversed** the attempted bear Dollar/bull Euro market ...

The pressure is on the Euro now. **We favour a strengthening Dollar in the longer term.**

That is, a continuance of the trend from the beginning of 2018.

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.

The market rallied back deep into the band of resistance as far as the 50% Fibonacci resistance – but failed there.

Look more closely.

Dollar Sterling Monthly spot cash LINE CHART based on closes

Note here the repeated testing of the resistance band formed from low closes.

It's a clear failure...

And now the market looks to be smashing down through the Prior low...

STOCKS:

Taking each market in turn: S&P: the bounce at the end of last week cannot disguide the vulnerability of the market to a sell off – the successive highs, the inability to sustain itself above the support from the 2018 highs... all point in the same direction. EuroStoxx: the weekly Key reversal of last week may prove the crucial signal. In the FTSE the weekly Key Reversal in early August may have been the critical signal....The Nikkei though with three successive failure at 22000, looks the perkiest of the Majors...a break of 22135 would portend a massive rally.

So the support from the succession of Prior Highs (6796, 6995) was smashed up through, then there was a powerful bounce from the diagonal uptrend support drawn from 2009... and the consequent push back above the band of support from the Prior Highs.

This should still give enormous confidence to UK investors because of the very long-standing and powerful support still beneath the market.
