CURRENCIES:

There is no clear change in the Dollar Euro situation. The medium-term charts of the Dollar Sterling are rather more telling, but the dominant pattern in the long-term charts (bear sterling) will take a good deal of reversing. The Dollar Yen remains dull. As does Sterling Euro in anything other than the very short-term.

Dollar Euro monthly spot cash chart

These powerful resistances above the market at 1.15 and above **reversed** the attempted bear Dollar/bull Euro market ...

The pressure is on the Euro now. **We favour a strengthening Dollar in the longer term.**

That is, a continuance of the trend from the beginning of 2018.

This is a clear failure by the market to get back above and stay above the prior low resistance at 1.1297.

Note the rally back to test the resistance from the Prior Low at 1.1110

Until that breaks the Dollar bears remain in charge.

The medium-term bear trend has been smashed: breaking the falling diagonal and the band of resistance from the Prior Lows.

(but NB the medium-term resistance still in place above)

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.
