IMPLIED ASSET ALLOCATION

Dollar Euro monthly spot cash chart

These powerful resistances above the market at 1.15 and above have **reversed** the attempted bear Dollar/bull Euro market ...

The pressure is on the Euro now. **We favour a strengthening Dollar in the longer term.**

That is, a continuance of the trend from the beginning of 2018.

But the long-term trigger for that is now a break beneath 1.0339.

IMPLIED ASSET ALLOCATION

Dollar Sterling Monthly spot cash chart

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.

The latest rally back into the band of resistance from those lows has failed...

Watch and wait now for a break back beneath the Prior Low 1.1450 to set off the bears.

Dollar Sterling Monthly spot cash LINE CHART based on closes

Note here the possible bear continuation triangle.

A break beneath the lower diagonal (around 1.20) would accelerate the bear move implicit in the massive bear formation in the long-term chart....wait for the monthly close.

The volatility is chaotic. **Stand aside.**

Note well that the market is in the middle of a wide range.

Dollar Sterling daily spot cash chart

The market's failure at the resistance from the Prior Low at 1.2750 is interesting, as is the breakdown through the rising diagonal... all rather bearish for Sterling.

IS that a bear rising wedge that has just completed?

The detail: a break of the low at 1.1277 has added to bearish Sterling excitement by completing a small Double Top.

Note that the completion level is now good resistance .

On balance - some pressure on the Sterling to continue : note the break of 1.1040 which is accelerating the bear move of the weakness of Sterling .
