### CURRENCIES:

The Dollar weakness has gained short-term momentum now the currencies having burst up through Prior Highs that may ratchet them higher still – but there's no real thrust coming from the long and medium term charts. On the contrary, if not neutral they remain negative for currencies.

### Dollar Sterling Monthly spot cash chart

All the Prior Pivotal lows of 1993, 2001, 2008 and 2016 have acted as good resistance. A massive Multiple Top has formed.

The latest rally back into the band of resistance from those lows has failed...

Watch and wait now for a break back beneath the Prior Low 1.1450 to set off the bears.

### Dollar Sterling Monthly spot cash LINE CHART based on closes

Note here the possible bear continuation triangle.

A break beneath the lower diagonal (around 1.20) would accelerate the bear move implicit in the massive bear formation in the long-term chart....wait for the monthly close.
