**CURRENCIES:** There was a slight currency rally over the week – but the general picture remains one of currency weakness led by the Yen ... Watch the weekly close of the Sterling Euro especially – still poised at a pivotal level.

Dollar Euro Monthly spot cash chart

In the long-term chart the Dollar bulls are encouraged by the multiple failures of the Euro to break above 1.10 – the big diagonal resistance at the bottom of the parallel channel.

### Dollar Euro weekly spot cash chart

Those **four** earlier failures are a lot clearer in this chart.

So the Dollar bulls are encouraged to begin to believe in a multiple top – if the latest rally in the Euro fails too...

When would it be confirmed? On a break beneath 1.05.

Not yet ...

### Dollar Euro spot cash chart daily chart...

In detail: this may be the beginning of a Euro sell off.

The broken horizontal support at 1.1017 and the broken diagonal support.... The market looks vulnerable.

But watch now the pause at the support from the Prior High at 1.0756.

### Dollar Sterling Monthly spot cash chart

Bouncing hard off the 1.0520 pivotal low from the 1980s.

It's an impressive bounce.

### Dollar Sterling Monthly spot cash **LINE CHART** based on closes

And the bounce looks to have smashed through this band of resistance at 1.2144.

The market broke up through the resistance band, and closed above at the end of the month to confirm that, for the moment, the chart remains bullish for Sterling.

### Dollar Yen monthly spot cash chart

The market has failed at the near-term Prior High in 2022.

And the long-term prior High of 147 in 1988 has not been overcome.

To convince the Dollar bulls, the market has to break above that band of Highs.

So Bulls now need a close above 151.94. Close, but not yet.

### Dollar Yen weekly spot cash chart

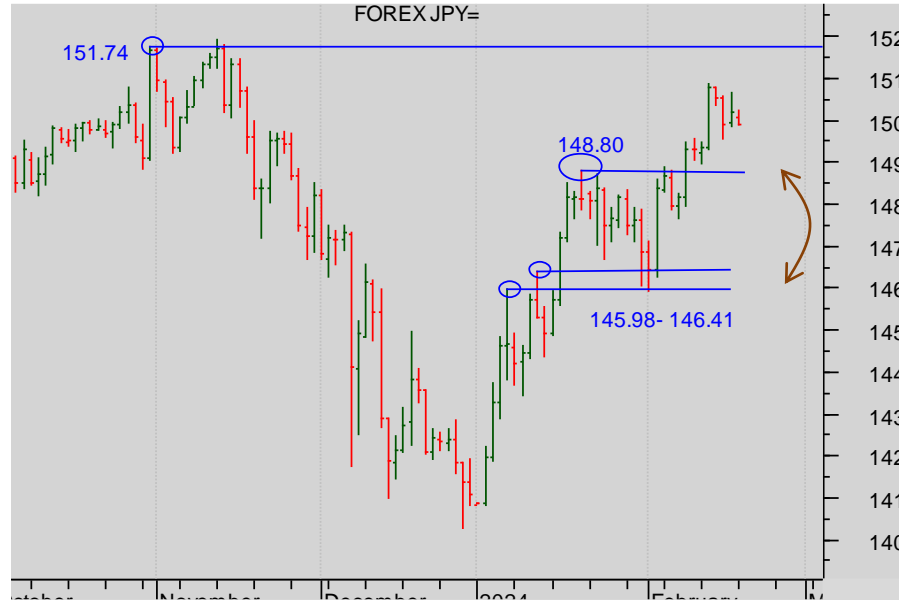

Bulls needed a close above the 151.94 to convince.

When the support from the Prior High broke at 145.07 the bears looked in charge but the last two weeks' rally should have disturbed the bears – the move for a weaker Yen looks determined!

Stand back and watch the price action at the pivotal band from the Prior Highs 148.74-151.94.

### Nikkei 225 CONTINUATION chart (Quarterly)

The market has completed a **complex but identifiable long run bull H&S reversal pattern** driving the market up to 40000 or so (measured on a linear chart.)

**BUT NOTE THE PROXIMITY of the all time high of 39600. That is a MAJOR point of reference.**

### Nikkei 225 chart (WEEKLY continuation)

Note the break up through 30720 - the retest and solidity of that old high as support **was a signal to add on bull positions.**

The clear H&S continuation pattern that has completed.

Minimum measured move?  
Up as far as 37500.

We've got there - so there's a possible dilution of the bull influence of the H&S pattern.

### Nikkei 225 chart Daily March 2024 future.

The break above 33750 was the short-term signal.

Watch the price action closely – the bulls have a break and close above 36980.

**BUT NOTE WELL THE CLOSE APPROACH OF THE ALL TIME HIGH ( MONTHLY CHART) AND THE EXHAUSTION OF THE H&S PATTERN IN THE WEEKLY CHART.**

## Bonds

**BONDS:** The US and European rates look set to drive higher from the look of the price charts. The bounce of the Gilt yields may already have found resistance.
