## Currencies: Dollar Euro

**CURRENCIES:** The Euro is edging lower against the Dollar. So too is the Sterling but the cross favours the latter. Watch the price action around the critical support in the Dollar Euro for valuable information. The Yen's tight short term range should be monitored too.

### Dollar Euro Monthly spot cash chart

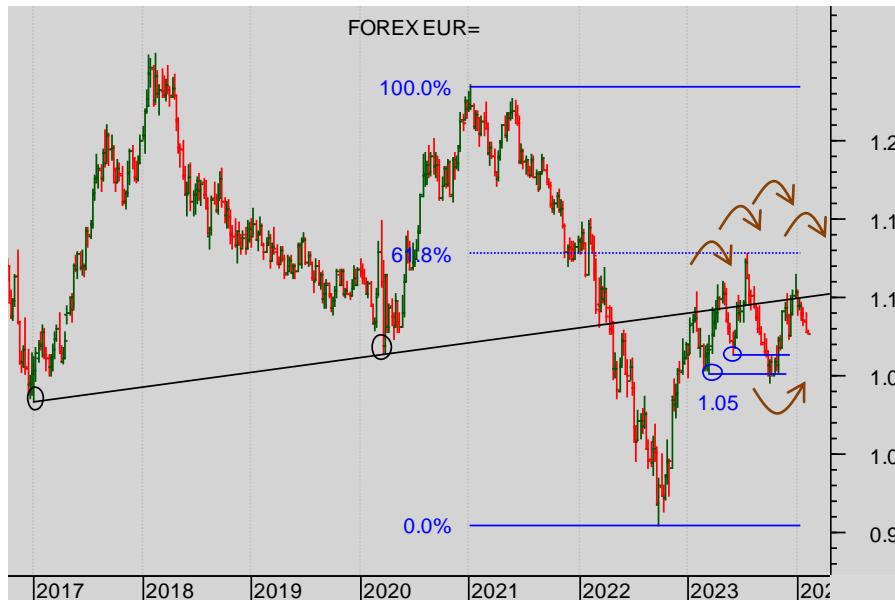

In the long-term chart the Dollar bulls are encouraged by the multiple failures of the Euro to break above 1.10 – the big diagonal resistance at the bottom of the parallel channel.

### Dollar Euro weekly spot cash chart

Those **four** earlier failures are a lot clearer in this chart.

So the Dollar bulls are encouraged to begin to believe in a multiple top – if the latest rally in the Euro fails too...

When would it be confirmed? On a break beneath 1.05.

Not yet ...

### Dollar Euro spot cash chart daily chart...

In detail: this may be the beginning of a Euro sell off.

The broken horizontal support at 1.1017 and the broken diagonal support.... The market looks vulnerable.

But watch now the support from the Prior High at 1.0756.

### Dollar Sterling Monthly spot cash chart

Bouncing hard off the 1.0520 pivotal low from the 1980s.

It's an impressive bounce.

### Dollar Sterling Monthly spot cash LINE CHART based on closes

And the bounce looks to have smashed through this band of resistance at 1.2144.

The market broke up through the resistance band, and closed above at the end of the month to confirm that, for the moment, the chart remains bullish for Sterling.

### Dollar Yen monthly spot cash chart

The market has failed at the near-term Prior High in 2022.

The long-term prior High of 147 in 1988 has not been overcome.

To convince the Dollar bulls, the market has to break above that band of Highs.

So Bulls now need a close above 151.94. Close but not yet.

### Dollar Yen weekly spot cash chart

Bulls needed a close above the 151.94 to convince.

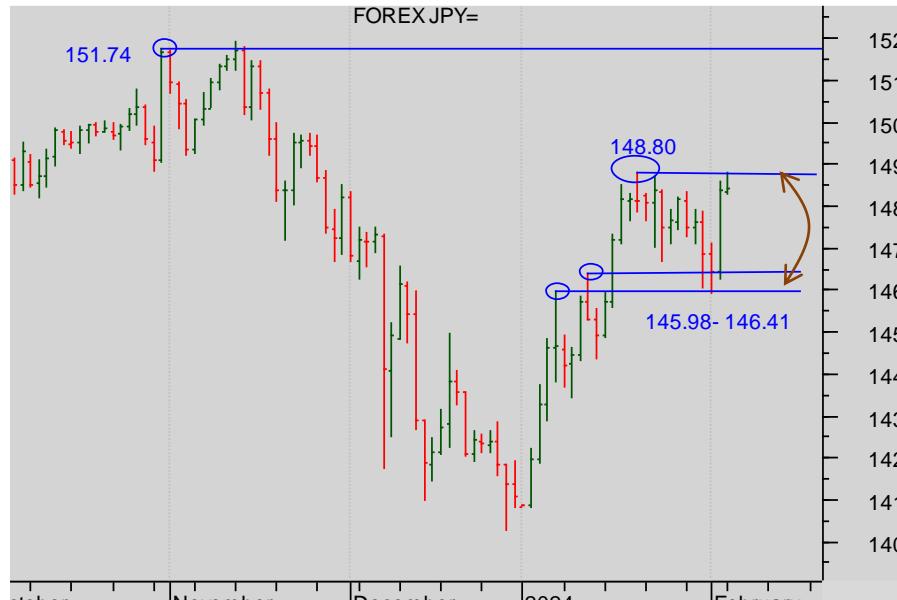

When the support from the Prior High broke at 145.07 the bears looked in charge but the last two weeks' rally should have disturbed the bears....

Stand back.

The market has completed a complex but identifiable long run **bull H&S reversal pattern** driving the market up to 40000 or so (measured on a linear chart.)

In the long term it looks very strong and resilient ( because bouncing off 3720) and so bullish.

Note especially the Weekly Key Reversal of the second bounce

Now the break up through 33720 ( completing a small H&S continuation pattern as well a breaking up through a Prior high) is a signal to add on bull positions.
